

PETER TIMOSHEVSKY

Full Stack Developer & DevOps Engineer | 8+ Years of Experience

+972 53-897-9318 | peter.timoshevsky@gmail.com | Tel-Aviv-Yafo | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Languages: English, Russian (Native), Hebrew (Professional)

Experience Summary

Programming Languages: JavaScript, TypeScript, Python, PHP, C++

Technologies: React.js, Next.js, Vue.js, Node.js, Express.js, Redux, Gatsby.js, Docker, Kubernetes, Jenkins, GitLab CI, CircleCI, Terraform, AWS (EC2, S3, Lambda, RDS), GraphQL, WebSockets, REST APIs, Vite, Webpack

Testing & Quality: Jest, Playwright, Cypress, Selenium, PHPUnit, TDD, BDD (Cucumber), E2E Testing

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Soft Skills: Team leadership, remote collaboration, stakeholder management, mentoring, agile methodologies

Professional Experience

Oct 2022 – Present: Technical Director and Co-founder, Knockout Industries (Remote)

Knockout Industries grew from a solo freelance practice into a web studio with a team of 7. The services provided included full stack web and mobile application development and digital marketing.

- Delivered 15+ custom web applications for SMBs, increasing their online revenue by average 40%
- Built responsive, SEO-optimized SPAs and e-commerce platforms with modern JavaScript frameworks
- Developed bespoke collaborative internationalization tool for altsh.ru
- Implemented custom CRM systems and real-time analytics dashboards using WebSocket technology

Technologies & Tools: React.js, Next.js, Node.js, PostgreSQL, MongoDB, AWS, Docker, GraphQL, Redux

Jun 2024 – Nov 2025: Senior Software Developer, Libertify (Remote, Israel)

Libertify – Leading AI-powered document management and web transformation platform serving Fortune 500 corporations with innovative solutions for content generation and interactive storytelling experiences.

- Spearheaded the successful public launch of DocuStream.ai and Libertify.com platforms, scaling to serve global enterprise clients
- Migrated legacy build systems to Vite, reducing deployment time by 60% and improving developer productivity
- Established comprehensive E2E testing frameworks using Playwright, achieving 95% full coverage for all user facing routes
- **Led HeyGenius AI Initiative:** Principal developer for innovative web-to-storytelling platform
 - Designed and implemented embeddable AI solution from concept to production
 - Led cross-functional team of 2 developers, coordinating with stakeholders and designers Integrated advanced AI models for dynamic content generation with editing tools
- Architected CI/CD pipelines using GitHub Actions and AWS Amplify for automated testing and deployment

Technologies & Tools: React.js, Next.js, TypeScript, Node.js, Vite, Playwright, Cypress, Jenkins, GitLab CI, AWS, Docker

Apr 2019 – Oct 2022: Lead Developer, StartupBlink (Remote)

StartupBlink – the world's most comprehensive startup ecosystem mapping platform, providing data and analytics for entrepreneurs, governments, and development organizations globally.

- Managed development of flagship platform (startupblink.com) serving 100,000+ monthly active users
- Led technical architecture decisions and orchestrated AWS infrastructure, reducing operational costs by 35%

- Delivered major enterprise projects:
- UN Analytics Platform for global entrepreneurship tracking
- CAREC Startup Ecosystem Portal serving 11 countries (Asian Development Bank) Coronavirus Innovation Portal – Rapid deployment achieving 1M+ views
- Mentored team of 4 junior developers, improving team velocity by 25% through code reviews and pair programming

Technologies & Tools: Node.js, React.js, PostgreSQL, AWS (EC2, S3, Lambda), Docker, Kubernetes, Redis

May 2018 – Apr 2019: Software Developer, VoxImplant (Voximplant) (Moscow, Russia)

VoxImplant – Market leader in communication platforms as a service (CPaaS), providing cloud-based voice and video solutions.

- Core contributor to VoxKit drag-and-drop communication platform using Vue.js and modern JavaScript
- Developed telecommunication scenarios for Fortune 500 clients:
 - Burger King: Automated call routing system handling 50,000+ daily calls
 - KFC: Custom IVR solution deployed across 200+ locations
- Optimized front-end performance achieving 40% reduction in load times through splitting and reorganizing components
- Collaborated in Agile environment with an international team of 15+ developers

Technologies & Tools: Vue.js, JavaScript, Node.js, WebRTC, Docker, REST APIs, Agile/Scrum

Feb 2016 – May 2018: Project Manager / Developer, Gridnine Systems (Moscow, Russia)

- Led Sabre Internet Booking Engine implementation for 5 major airlines
- Managed cross-functional team of 8 developers and QA engineers with 98% client satisfaction rate Resolved critical production issues maintaining 99.5% system uptime

Technologies & Tools: JavaScript, SQL, Project Management, Agile Methodologies

Education

2023 – 2030 (Expected): MSc Computer Science, Heriot-Watt University, UK

Second-year student

Professional Certifications:

2024: Full-Stack Coding Bootcamp – Developers.Institute, Israel

2024: Certified Kubernetes Administrator (CKA) – Linux Foundation

2018: Front-End Web Developer Nanodegree – Udacity

Personal Projects

Israbuy – A full-stack marketplace platform built with Next.js, TypeScript, Redux Toolkit, Tailwind CSS, and Supabase

A full-stack marketplace platform built with Next.js, TypeScript, Redux Toolkit, Tailwind CSS, and Supabase for authentication, database, and file storage. Features include internationalization, responsive UI, secure user accounts, and product listing management. Stay tuned for the launch!

traymond – Open Source Windows System Utility

A Windows application for minimizing windows to system tray icons, built with C++ and WinAPI. Features include hotkey support, multiple window management, and system tray integration. 650+ GitHub stars, actively maintained with community contributions. github.com/fcFn/traymond

Open Source Contributions

Active contributor to the FOSS ecosystem. Regular contributor to React ecosystem, development tools, and documentation. Published technical articles on Medium reaching 5,000+ developers.
